HVAC Contractor Breakfast run 7:30a-11:30a

All other Full-day Events run 8:00a - 4:30p

**Events offered to Illinois Investor-Owned
Utility customers at no cost.**

This workshop is Instructor-led utilizing a copy of "Bob's House—a case study for the residential HVAC design process;" and short-forms used for quick and easy review of residential HVAC designs. These are hands-on classes. Participants need to bring pencils with erasers and a duct calculator.

!! DISCOUNT !!

Receive -20% off list-prices of Elite Software, or -25% off selling prices of Wrightsoft Software, for attending.

2012 IECC EFFECTIVE JANUARY 1, 2013 HEATING & AIR CONDITIONING DESIGN, THE MISSING INGREDIENT IN MOST HOMES

A home's HVAC systems not only consume huge amounts of the home's total energy budget, but also impact the comfort and well-being of the occupants more than any other system in the home.

The Illinois Energy Office has announced a Building Industry Training series directed at the Illinois residential heating & air conditioning industry to support implementation of the 2012 IECC, effective January 1, 2013.

Homebuilders, HVAC contractors, code

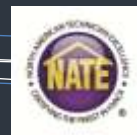

officials and those interested in home performance are encouraged to attend.

The IRC and IECC require room-by-room ACCA Manual-J load calculations and since 2009, the use of ACCA Manual-S for sizing equipment as part of the permit and inspection process.

Topics covered include:

- ACCA Manual J8ae (loads)
- ACCA Manual S (sizing)
- ACCA Manual D (duct design)
- ASHRAE 62.2 Ventilation
- Compliance Documentation

Events approved for 6.0 AIA HSW/SD LUs, 3.75 BPI CEUs, 6.0 GBCI CE hours, 6.0 NATE Class hours and 0.6 CEUs toward ICC certification renewal.
